

ABOUT

■ GIGA Society™

As an experimental high-range IQ project, GIGA Society™ is an extremely high IQ society for the certified highest IQ people who scored at or above IQ 190 (SD 15) on an acceptable high-range IQ test, in partnership with World Mind Sports Council & World Memory Championships founded by Tony Buzan, the inventor of Mind Maps. GIGA Society™ was founded by [The Brain Trust](#) registered in 1989 as a nonprofit organization in the United Kingdom.

GIGA Society™ has a total of [nine members](#) worldwide, including individuals from Asia, Europe, and America. Their diverse professional backgrounds include MIT graduates and university professors. GIGA Society welcomes geniuses from all over the world.

The President of GIGA Society™ is Dr. Tom Chittenden who is an Honorary Professor in the Department of Artificial Intelligence at the University of London.

■ About High Range IQ Test

High-range IQ tests were developed experimentally to measure IQ in the very high range. The more common official IQ tests, such as Stanford–Binet and Wechsler, are limited in that they measure adult IQ only to approximately IQ 160 (SD 15). Theoretically,

however, human intelligence can be calculated statistically up to roughly IQ 195 (SD 15) and high range IQ tests have been developed as a result of this statistical reason.

The method of standardization for these high-range IQ tests can be said to have a strong experimental tendency, because obtaining sufficient data is difficult due to the rarity of the measurement range. Scores based on the preliminary norm are also subject to similar skepticism. Even so, it is difficult to deny the reliability and validity of high-range IQ tests, given that the people who perform well on them also perform well on the official IQ tests.

Based on these high-range IQ tests, GIGA Society™ recognizes extremely high intelligence of IQ 190 (SD 15). One of GIGA Society's missions is to find additional excellent high-range IQ tests. This mission is currently overseen by a council of two members.

■ Qualifications

1. Renowned experimental untimed high-range IQ test score \geq IQ 190 (SD 15) on 1st attempt.
2. Once a test is used to admit a member to GIGA Society, it may not be used again for the admission of any other members.
3. Tests are adopted through review by external advisors and internal admission committee.

■ Membership Types

1. All GIGA Society members have full membership.
2. Membership is free of charge

■ Membership Benefits

1. The function of GIGA Society is to certify the "giga" intelligence level of each member. Therefore, all GIGA Society members receive an official certificate from the society, documenting their $IQ \geq 190$ (SD 15).
2. Members communicate via private forums, through which they can interact with each other and collaborate on confidential projects.

■ Warning: Here is the official GIGA Society™ for the certified highest IQ people who scored at or above IQ 190 (SD 15) on an acceptable high range IQ test. However, there is another giga-level group which accepts unprofessional uncensored tests authored by the group's founder who is not properly disciplined academically.

■ Disclaimer: [IQ Olympiad Foundation Ltd](https://iqolympiadfoundation.com) is a cryptocurrency company by share, founded by Dr. Ronald Hoflin, the founder of Mega Society, together with a South Korean Jeong Kye-won(정계원) called Andrew Zheng or Andrew Jeong. The legal founder and CEO of IQ Olympiad Foundation Ltd is Jeong Kye-won(정계원). No GIGA Society is affiliated with the IQ Olympiad and Mega Society.
